7(a) (CSE-2009 / Paper II) [Note: First describe what you are going to do in a log/flow chart in brief.]

Solution To find the root of $f(x)=0$ using Regula-Falsi method starting with two initial iterates x_0 and x_1 , we apply the following iterative formula.

$$x_{k+1} = x_k - \frac{x_k - x_{k-1}}{f(x_k) - f(x_{k-1})} f(x_k)$$

After evaluating x_{k+1} , we compare the signs of $f(x_{k+1})$ ~~with~~ ^{and} $f(x_k)$

if signs are same the next iterates are x_{k+1}, x_{k-1} otherwise

x_{k+1}, x_k .

If at any intermediate iterative step the difference between x_{k+1} and x_k is less than ϵ (prescribed error) we stop and print the result.

^{Otherwise} We do iterations till limit n is reached.
